

INSTALL INSTRUCTIONS

1. Install Intel® Firmware Engine Release 3.0 ([Intel® Firmware Engine_R3.0.zip](#)) if not installed already. Follow the getting started steps in the Intel® Firmware Engine quick start guide ([Quickstartguide_R3.0.pdf](#)).
2. Right click on the "IntelFirmwareEngineCeleronN3000Setup_1_3.exe" file and select "Run as Administrator" then follow the click through menus to finish install.
3. After installation, open Intel® Firmware Engine 2.0 and select 'New Project ...' from the File dialogue. Under 'Source project', verify 'Intel_Celeron_N3000_Processor_Platform' appears as option in the drop-down box.
