INSTALL INSTRUCTIONS

1. If there is a previous version of the Intel® Firmware Engine prior to the release 2.1.1 version it is required to uninstall prior versions before installing this release. Under the Control Panel use the

"Uninstall a program" menu to uninstall any previous versions of the Intel® Firmware Engine and keep any prior work desired.

2. Follow the Quick start guide for system requirements.

Install the "IntelFirmwareEngineSetup_2_1_1.exe" file and follow the click through menus.

NEW FEATURES AND CHANGES

1. See New Features and Changes from Version 2.1.0 Release
2. Version number updated to version 2.1.1 for Reports, tools path, install screens and version check.
3. Fix an issue that occurred while adding GPIOs using Windows 10* that caused the application to hang
4. Fix an issue that occurred when dragging components to the GPIO table more than 20 times that then caused a hang in the application
5. Fix an issue that occurred when the value of a 'GPO Initial Output Level' was changed not accepting the changed value

PLATFORM DEPENDENT

See Platform Dependent features from Version 2.0.0 Release

KOWN LIMITATIONS

Application:

1. See other Know Limitations from the Version 2.1.0 and the 2.0.0 Releases
2. Install error can occur after opening the PlatformProfile.inf in the repository database and then uninstalling followed by an install. The subsequent install may fail.
